

Ropeways for Tourism Applications

 ... to enthusiasm.

 From enjoyment ...

Doppelmayr/Garaventa Group

Taking the long view, identifying trends, creating innovations – these are the strengths you can count on as a Doppelmayr/Garaventa customer. With leading-edge ropeway technology, we set the benchmark for transport systems geared to the future. Your trust in our capabilities and products motivates us to provide you with top performance every time. As your partner we take pride in our reliability.

The Doppelmayr/Garaventa Group is quality and technology leader in the ropeway sector. It is the combination of innovative spirit and vision, outstanding product quality and a no-compromise approach to safety that sets the company apart. An in-depth understanding of customer wishes as well as professionalism has secured the Doppelmayr/Garaventa Group its pole position in the global ropeway market.

Doppelmayr/Garaventa is your competent partner for custom-made ropeway solutions right from the initial planning stages through to completion of the entire installation, with optimal support throughout operation. Thanks to its comprehensive know-how and many years of experience, Doppelmayr/Garaventa knows the needs and requirements of lift operators inside out.

We have already implemented many technically demanding and economically successful ropeway systems. That is why we can guarantee you the best possible solution to suit your specific requirements. Talk to our specialists and take us at our word.

The ropeway – attraction for summer tourism

Ropeways are the ideal means of transport for summer tourism applications. They are neither weather- nor climate-dependent and can be used to cross virtually any terrain. The wide range of ropeway types can be individually designed to provide access to exposed hiking routes, as a transport link to recreation areas on mountains or as an attraction in theme and leisure parks.

Exceptional experiences and special attractions make entire cities, regions and holiday destinations all the more appealing for tourists. That is precisely what ropeways have to offer. They turn a visit into an experience. As well as being extremely ecological and economical in nature, they can be tailored exactly to the needs and requirements of the region and the users. Cutting-edge ropeway systems set new benchmarks in added value for tourism.

With all its products, Doppelmayr/Garaventa stands for optimal quality and proven technology. That provides the foundation for consistently high availability and short waiting times. Hikers, families with children, wheelchair users, paraglider pilots and senior citizens all enjoy a comfortable and relaxing ride experience with superb views thanks to exemplary barrier-free transport.

Low CO₂ emissions

Comparatively low investment costs along with low maintenance and operating costs make the ropeway an economically efficient alternative to conventional transport systems. Another impressive feature is its low level of emissions (particulates, CO₂).
